# Outline

1. Motivation
2. Flow Chart
3. Data
4. Method
5. Result

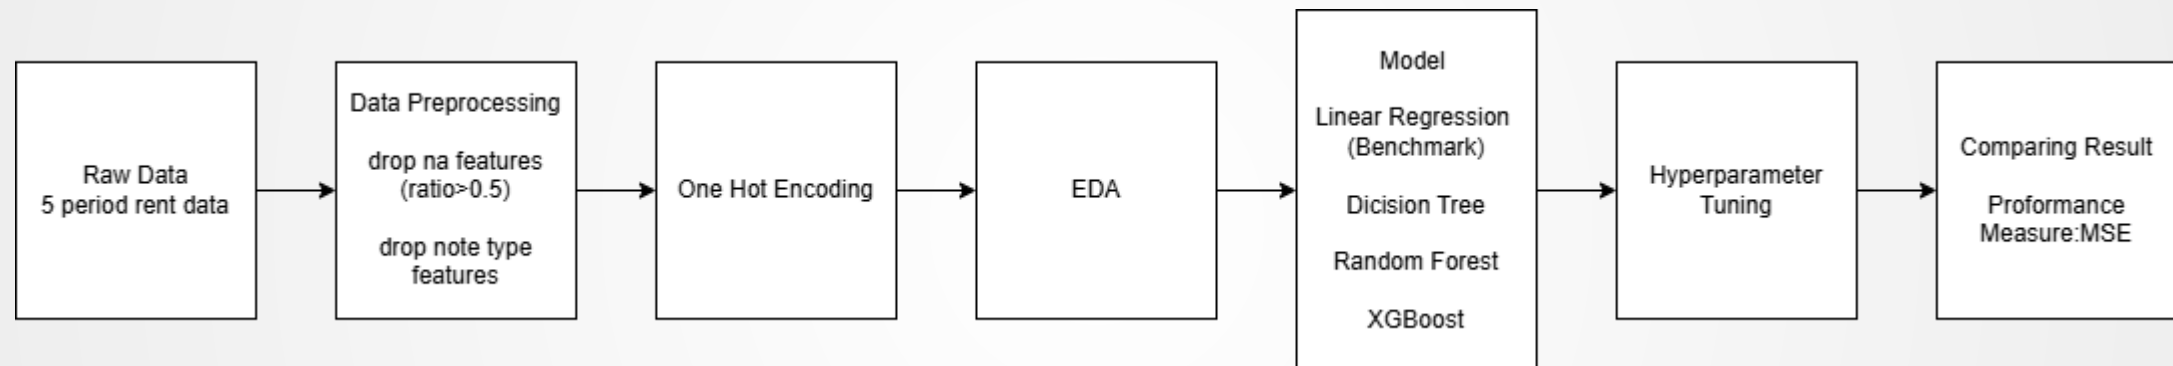

## Motivation

- In recent years, the housing issue in Taiwan has become a hot topic, which has led to a sharp rise in housing prices.
- Rent plays an important role in the housing market, directly reflecting the supply and demand relationship.
- It is hoped that the model can serve as a benchmark for both landlords and tenants in deciding rental prices.

# Flow Chart

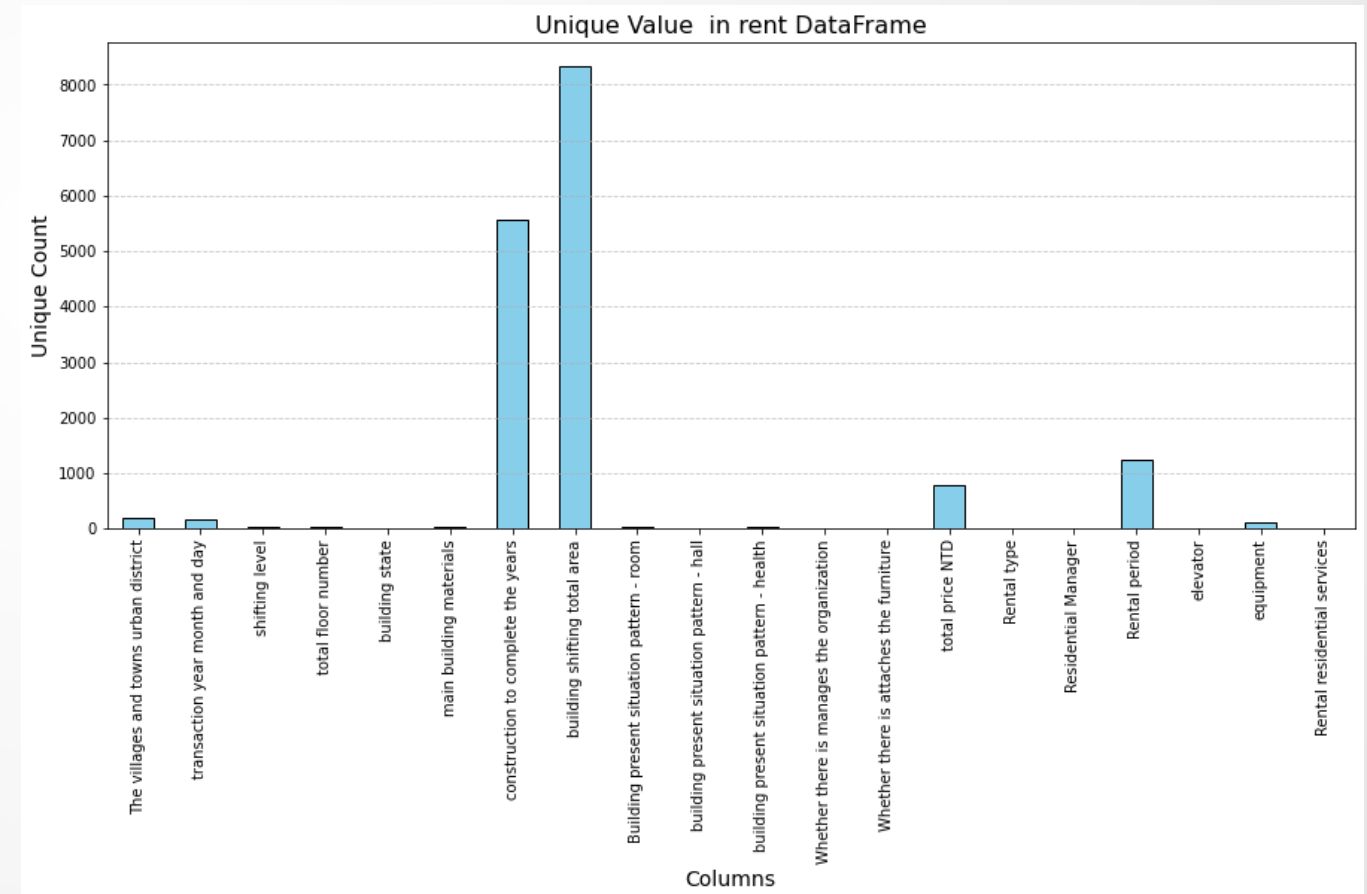

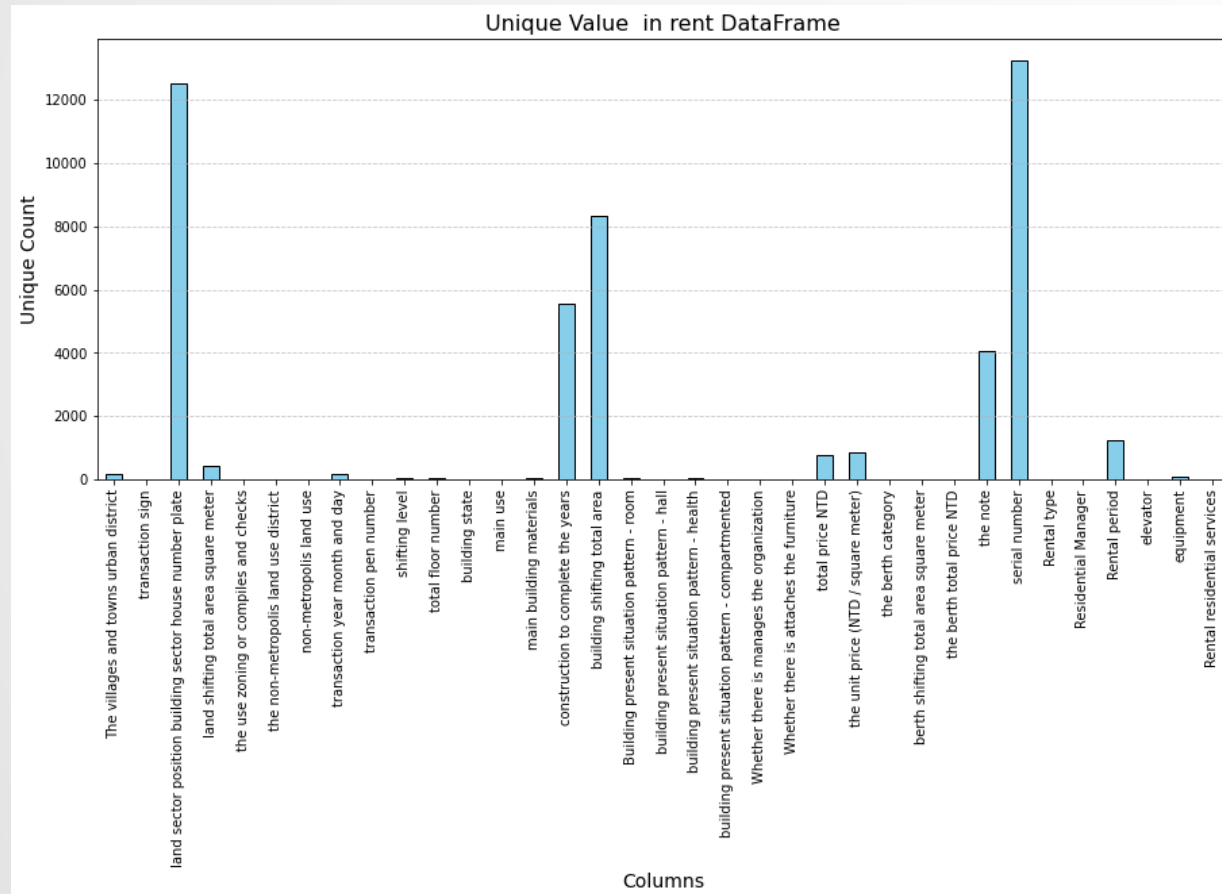

# Data

- Source: 不動産成交案件 (Dept of Land Administration M. O. I.)
- Release Date: 240811~240921 (Total 5 periods)
- Size:  $n=36498$ ,  $p=35$

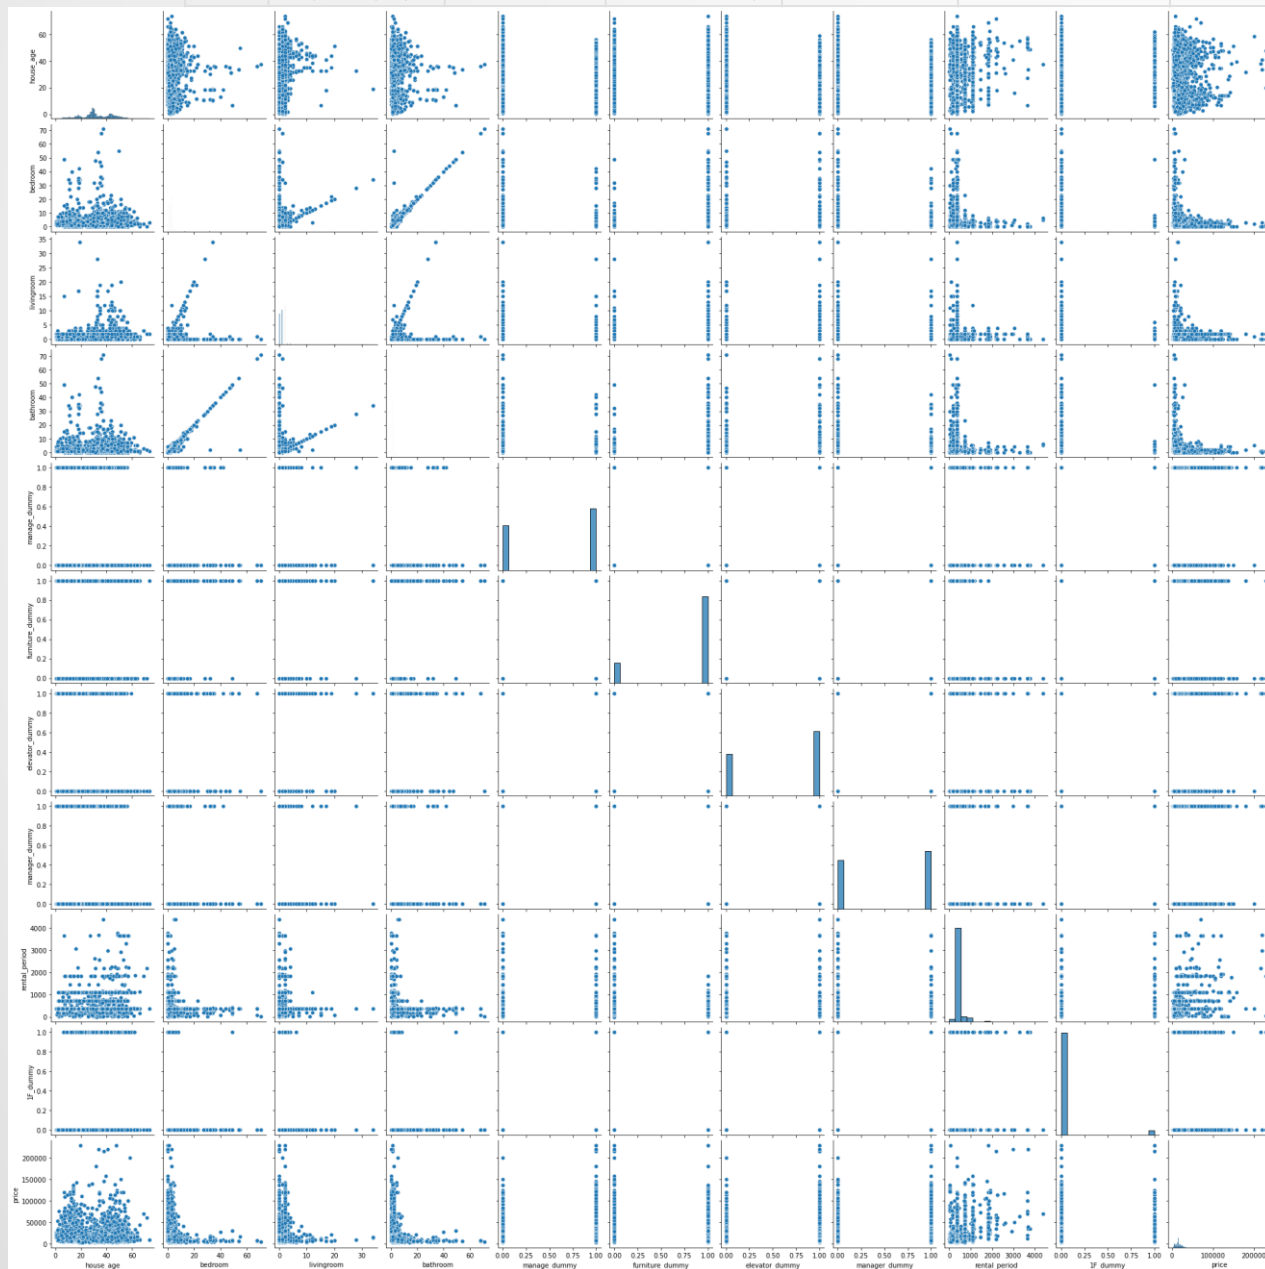

# Data

- Drop nan ratio>0.5 features
- Drop note type features
